| Crime Prevention CCTV Solutions

Crime Prevention Through Environmental Design (CPTED)"(Crime Preven Through Environment Design)
Security Camera Solutions for Environmental Improvement

By prioritizing the installation of cameras in areas with poor lighting or low human traffic, which are prone to higher crime rates, this solution aims not only to prevent crimes in advance but also to secure evidence in the event of a crime. It ensures rapid apprehension of criminals and contributes to national public safety management.

| Intelligent CCTV Solution

A smart solution that analyzes and detects using intelligent behavior recognition video algorithms based on the video information obtained from CCTV, and immediately provides information to the administrator.

A foundational solution for smart cities that uses various algorithms to generate big data from video information, including detection of vehicles, people, falls, intrusions, loitering, and density.
